

## Request for revision of deliverable submission for the project "Music360 (101094872)".

On date 28/06/2024, the officer "Melpomeni VYZIKA" has requested the revision of the submission for the deliverable with title "A distributed architecture and implementation for music data collection, representation, and distribution – version 1" and number "2" for the project "Music360 (101094872)".

### *Request for revision comment:*

This deliverable appears to be incomplete and behind schedule with implementation. This should be evaluated for risk and impact on the future project deliverables. There seems to be a conflict between status reports with relation to this deliverable – D2.2 is indicated to be 'complete' in Table 3 as a submitted document. But the grant award document and Description of Action defines this as an 'other' type of deliverable (i.e. not just a report). Clearly the implementation is not complete, as indicated in List of Milestones status.
