

RADIATION ONCOLOGY

BIOLOGICAL, PHYSICAL AND CLINICAL ASPECTS OF IRRADIATION

We are happy to invite you to the Radiation Oncology course!

This one-week course provides you an overview of:

- Radiobiological and physical principles of radiation oncology
- Technical innovation in precision radiotherapy
- Route of the patient: diagnosis, imaging, planning & therapy.

Next to lectures of experts in the field, the course encompasses three practical trainings:

- The radiobiology laboratory
- Computer-based target volume delineation
- Patient treatment simulation on a linear accelerator.

November 10 – 14, 2025
