

RUDOLFE MAGGIUS Seminar Series

26 January

Francis Rousset

From Auditory Neuron
Regeneration to
Drug Screening

26 February

Jonathan Rosand

Brain Health and
The Global Brain Care
Coalition

23 March

Eve Seuntjens

Incorporating Non-model
Species Octopus and
Killifish into
Neuroscience

22 April

Anna Månberg

Plasma Proteomic Profiling
for Neurodegenerative
Diseases

18 May

**Roosmarijn
Vandenbroucke**

(Neuro)inflammation and
blood-CSF barrier

22 June

Gilad Silberberg

Basal ganglia circuits for
sensorimotor functions

22 July

**SUMMER
BONUS LECTURE
Simon Eickhoff**

Machine-learning for
precision medicine:
Avenues and
Roadblocks

28 September

Odile Viltart

Modeling Anorexia Nervosa:
Translational Insights
from Animal Studies

26 October

Maarten Lansberg

From Acute Intervention
to Long-Term Recovery
after Stroke: Advances in
Imaging and
Therapeutics

30 November

Sascha Martens

Degradability of Protein
Aggregates by
Autophagy

14 December

Kevin Mitchell

Understanding the Genetic
Program Specifying the
Wiring of the Brain

Monthly lectures by renowned scientists,
between **16:00-17:00**

**Don't forget to sign up for available workshops!*
